How to use your Stencil Ease Holiday Gift Tags Stencil

Practice your stenciling technique on a piece of paper or cardboard before applying to your project.

- 1 - Position the stencil onto the surface and tape it to the desktop using painter's tape or repositionable spray adhesive.
- 2 - Use the #6 and 8 double ended stencil brush, dip brush with acrylic paint, paint over a stack of paper towels to remove excess paint. Paint over opening in stencil. **IMPORTANT:** Use very little paint on brush. Brush almost all of the paint onto the paper towel before using the stencil!
- 3 - Remove the stencil and let the acrylic paint dry for 24 hours. Remove any leftover paint off the stencil for future usage.
